# Product Data Sheet

Extra Durable Felt for Sheds and Garden Buildings

August 2012

## Features and Benefits

- Advanced formula roofing felt
- High performance waterproofing
- Installed in exactly the same way as traditional shed felt
- Longer life expectancy (up to 15 years)
- Peace of mind protection from the elements
- Ideal for garden buildings that house possessions important to you

## Description

IKO Super Shed felt is a longer lasting, polyester reinforced felt, with a green mineral finish. Available in 1m x 8m rolls, this robust waterproofing membrane is expected to last up to 15 years.

## Product Details

	<b>Super Shed Felt</b>
Roll Weight (kg)	17kg
Roll Dimensions	8m x 1m
Base Type	Polyester

## Typical Properties

Property	Test Method	Unit	Super Shed Felt	
			MD	TD
Tensile Strength	BSEN 12311-2000	N/50mm	MD	>300
			TD	>200
Elongation at Break	BSEN 12311-2000	%	MD	>30
			TD	>40
Nail Tear Resistance	BSEN 12311-2000	N/50mm	MD	>120
			TD	>130

## Application

Used as a single, two-layer or three-layer application, Super Shed Felt is ideal for use on sheds and other garden buildings.

Super Shed Felt should be installed in accordance with the relevant sections of BS 8217: 2005, Code of practice for reinforced bitumen membranes for roofing and to IKO's specifications.

If applied by traditional pour and roll methods, hot bitumen is poured (or applied by a mop) in front of the roofing felt roll, which is then unrolled into the bitumen, spreading it to give a continuous coating for the full width. The membrane is applied with minimum 75 mm side and end laps.

Where used as a single layer on a shed roof, the minimum pitch of the roof should be 20 degrees. Super Shed Felt should be nail fixed with the laps fully sealed in IKOpro HP Cold Adhesive.
