Just a Pick&Click!™ away

All our VELUX blinds feature the unique Pick&Click!™ mounting system. This patented VELUX installation method means they can be fitted in minutes. No matter what type of VELUX roof window you have – large or small, old or new – all our blinds will fit flawlessly every time.

Watch the demo
See for yourself how easy it is to fit a VELUX blind. Watch our quick demo (it's less than 60 seconds) at youtube.com/veluxgbi

The best roof windows, the right blinds and shutters

We manufacture the largest range of roof window blinds and shutters on the market, so you'll be spoilt for choice. VELUX blinds and shutters are made especially for VELUX roof windows. They're easy to fit and made for long-lasting and reliable performance.

The perfect blind for you

Controlling the amount of warmth and daylight in your home is key for enjoying your ideal environment and optimum comfort. Your VELUX blinds are an important part of getting your indoor climate just right, giving you more flexibility and control over heat and light. From keeping your bedroom warm on chilly nights, to stopping your extension getting too warm on a bright day. Plus, with the biggest range of styles, fabrics, colours and designs, VELUX blinds can transform how your living space looks too.

A rainbow of colours

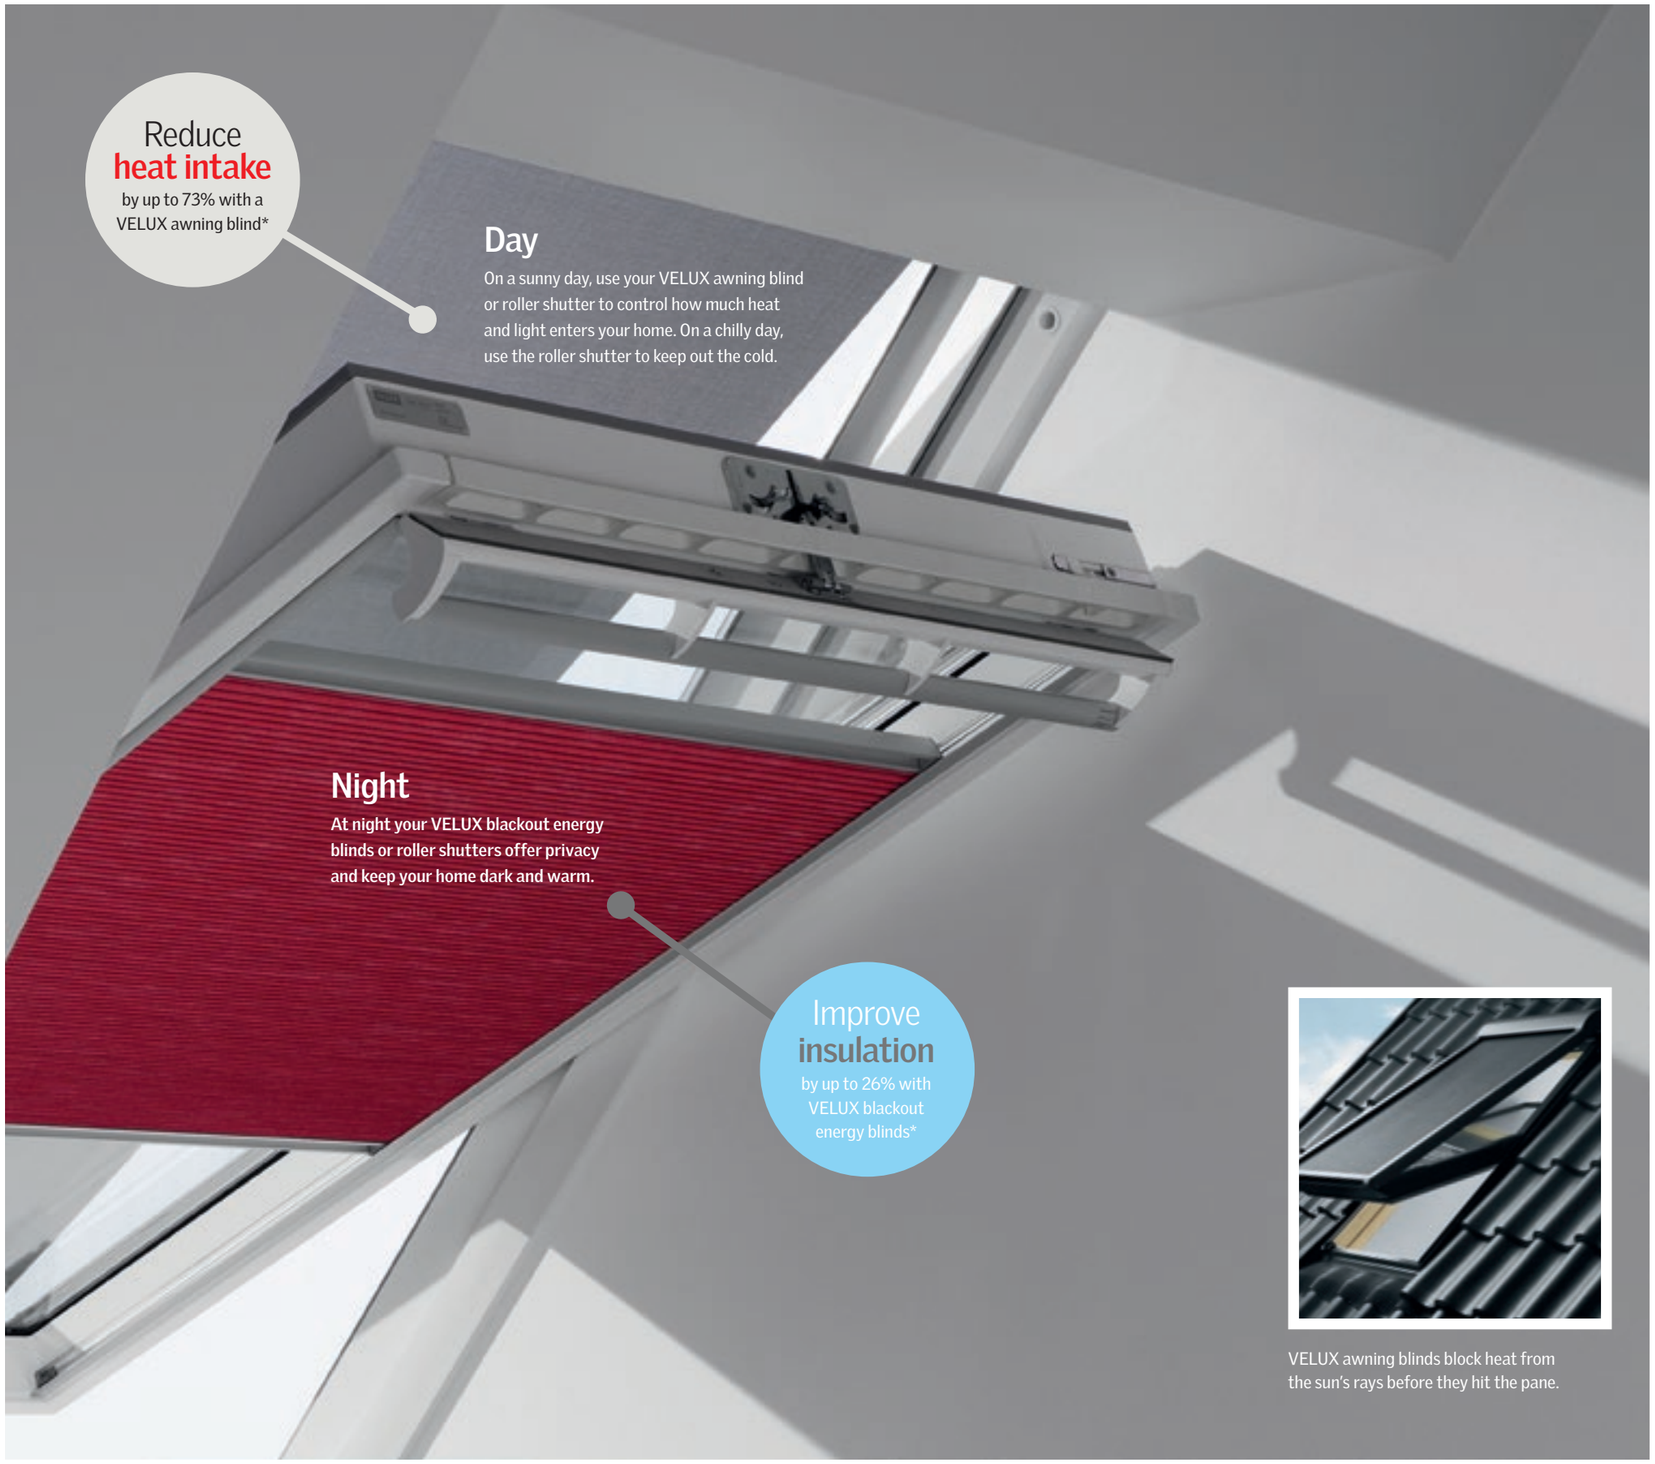
From hidden cords and slim designs to darkened blackout side rails and Oeko-tex® fabrics, our blinds have quality built in. Whether you need light control, heat protection, a sophisticated look or a splash of colour, you are sure to find the right blind for your needs. Simply choose from our wide range of blinds and select a colour or pattern that complements your room.

Comfort and convenience

We offer a variety of convenient ways to operate all of our blinds and shutters. You can choose from manual, solar or an electric powered operation. Electric blinds are for VELUX INTEGRA® electric roof windows and can be operated by your existing VELUX INTEGRA® control pad. You can fit a solar blind to either a solar or manual window, and still have the convenience of the remote control function.

It's all in the details

Our high performance, award-winning blinds and shutters are built to last. They are rigorously tested to ensure flawless operation even after years of everyday use and exposure to the elements. For generations, VELUX engineers and designers have been perfecting our products and patented solutions. That's why VELUX blinds and shutters are the best choice for your VELUX roof windows.



VELUX awning blinds block heat from the sun's rays before they hit the pane.

Improving your home's indoor climate

Your VELUX roof windows bring warmth and light into your home. Controlling these elements with the help of VELUX blinds and shutters is key to achieving an ideal indoor climate.

VELUX blinds and shutters provide extra insulation, daylight control and heat protection. In this way they can reduce your home's energy consumption by minimising heat loss during the winter and heat gain on a hot, sunny day. With VELUX INTEGRA® solar or electric powered operation, you get the added convenience of a touch-screen control pad with the ability to programme everything to open and close at just the right times.

Protect your home against heat loss

Although VELUX roof windows are well insulated, interior VELUX blackout energy blinds can further reduce heat loss by up to 26%. This extra insulation is especially important on a chilly night during the winter months.

Protect your home against the heat

Passive heating from the sun is a major benefit on a cold day, but can lead to overheating in warmer months. VELUX roller shutters can reduce the heat impact of the sun by up to 90%.

* The technical values of various accessories are determined through standardized tests and calculations, all in compliance with the international standards EN ISO 12567-2, EN 13363-2 and ISO 15099. Effect depends on type of roof window and glazing.

Please note that when blinds are rolled down the risk of condensation is increased. Therefore rolling up the blind after use and ventilating regularly is recommended.

Replace and upgrade with ease

REPLACE AND UPGRADE

VELUX blinds can be fitted to out-of-reach windows and operated by remote control.

The beauty of VELUX blinds is that you can replace and update them quickly and easily, whenever the mood takes you.

Perhaps you've moved into a property with VELUX roof windows, you're redecorating your space, or your old blind has seen better days. Whatever your interior design aspirations, our extensive range of products means you can have the perfect blind fitted in next to no time.

Fitted in minutes

You can fit a new VELUX blind to a VELUX roof window of any age or size. That's because all our windows feature the unique Pick&Click!™ mounting system, which means your blind can be fitted in minutes.

Time for an upgrade

For out-of-reach windows why not upgrade to the solar powered version, which includes remote control operation?

Quality as standard

They may be quick to install, but they're made to last. All VELUX blinds come with a 3 year guarantee.

VELUX blinds come in a range of styles and colours to complement your interior.

VELUX blinds can be fitted in minutes with our Pick&Click!™ system.

Perfecting your open plan extension

LIVING SPACE

VELUX roof windows can bring twice as much daylight into your extension as vertical windows of the same size, making your space feel brighter, larger and more welcoming. It goes without saying any living space should also be comfortable and practical. With VELUX blinds you can enjoy your extension just the way you want it.

Choose your style

VELUX pleated blinds create a cosy, relaxing atmosphere by softly dispersing incoming daylight. They also offer privacy and can be positioned anywhere on the roof window.

If your open plan extension space also doubles as your kitchen, then our moisture resistant and easy-to-clean VELUX Venetian blinds are a great choice.

Updating your decor?

Updating your blinds at the same time couldn't be easier, with our fast and hassle-free Pick&Click!™ system.

Choose a VELUX awning blind for temperature control. These exterior blinds reduce heat intake by up to 73%.

With our VELUX INTEGRA® touch-screen control pad, you can manage all of your home's electric VELUX products with one touch.

Pick&Click!®

VELUX Pick&Click!™ system makes installation fast and simple.

Uplifting loft conversions

LIVING SPACE

VELUX roof windows bring the outside in and offer fantastic views. This bright, airy feel is especially important in a loft living space, a place where your family can relax together. To make it as welcoming and comfortable as it can be, VELUX blinds and shutters provide adjustable light, temperature control, privacy and a decorative touch.

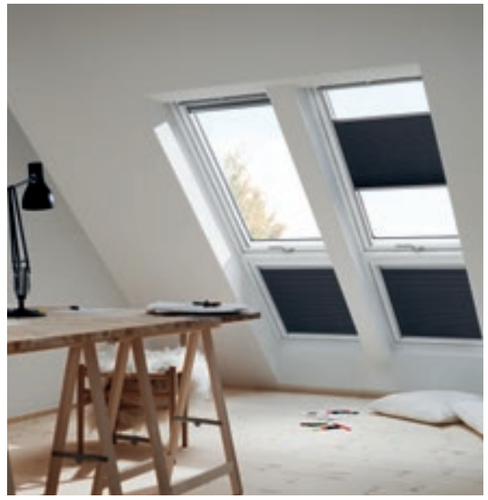
The right light

VELUX roller blinds are a simple and stylish way to soften incoming daylight and provide privacy. The aluminium side channels allow the blind to be placed anywhere on the roof window allowing you to control the amount of daylight filling the room.

All day comfort

To keep temperatures comfortable all day long you can combine any interior VELUX blind with an awning blind. These transparent exterior blinds block the sun's rays before they hit the roof window pane, reducing heat intake by up to 73%.

VELUX roller blinds can be placed anywhere on the roof window so you can adjust the amount of incoming daylight throughout the day.



The VELUX pleated blind is an elegant way to provide privacy while bathing your room in a pleasant, soft light.

Creating your dream retreat

BEDROOM

The perfect bedroom is a space where you can relax and recharge your batteries. VELUX blinds are essential to making your bedroom comfortable and inviting by day, while allowing you to adjust or black out the light at night.

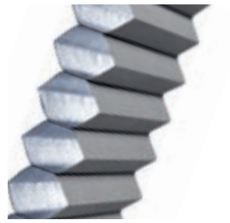
Daytime or dreamtime

If a completely dark room is important to you, our standard blackout blind fabric offers complete blackout to ensure a restful sleep, even in the middle of the day.

If you use your bedroom as a quiet space for reading or watching television, glare reduction is also important. VELUX blackout energy blinds can be positioned anywhere on the VELUX roof window, so you can block the sun just where you need to and enjoy privacy without sacrificing daylight or your view. When fully drawn, blackout energy blinds effectively darken the room and add extra insulation.

If you want the best of both worlds – softly diffused natural daylight and complete darkness any time – our VELUX duo blackout blind is for you. It's a blackout blind and a pleated blind in one.

Combine your interior blind with an exterior awning blind to block the sun's rays and reduce heat. Exterior VELUX awning blinds reduce heat intake by up to 73%.



VELUX blackout energy blinds have a honeycomb structure for exceptional insulation.

The VELUX duo blackout blind combines our blackout blind with our pleated blind in one.

Pick&Click!®

VELUX Pick&Click!™ system makes installation fast and simple.

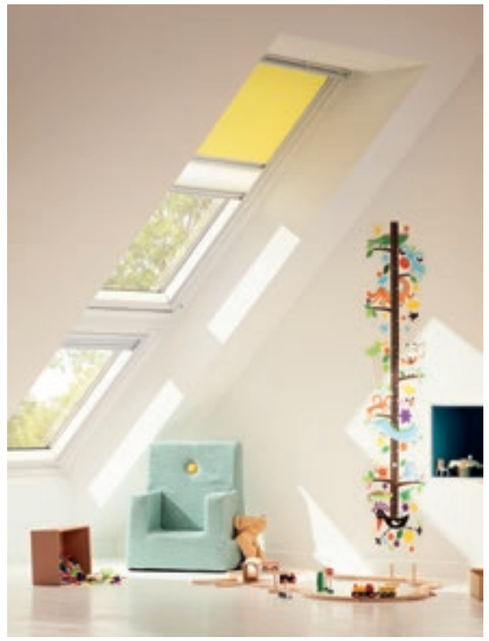
Awning blinds p46

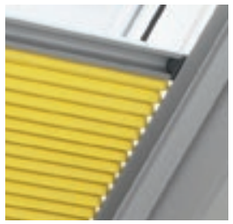
The right balance for sleep and play

CHILDREN'S ROOM



The duo blackout blind is available in any of our 24 blackout blind designs along with a white pleated blind.

VELUX awning blinds block the sun's rays before they hit your VELUX roof window pane reducing heat.



VELUX blackout energy blinds have a honeycomb structure for exceptional insulation.

A child's room is a truly multi-purpose space. At night, quiet and darkness are key for a peaceful sleep, but by day, the ability to adjust the incoming sunlight is important for ensuring a comfortable temperature and creating the right environment for homework and play. Blinds with round-the-clock benefits are the perfect fit for these versatile, lively spaces.

Day or night

An ideal solution for a child's room is the VELUX duo blackout blind as it combines the darkness of our blackout blind with the softly diffused daylight of our pleated blind. This provides a practical two-in-one solution that keeps out the sun during naptime and offers a softly diffused light during playtime.

VELUX blackout energy blinds can be positioned anywhere on the VELUX roof window. They allow you to block direct sunlight while still letting in plenty of daylight, and their unique design provides improved insulation all year round. When fully drawn, our blackout energy blinds darken the room to ensure a good night's sleep.

Climate control

For an even more comfortable temperature in your child's room, you can combine each of the interior blinds with an exterior VELUX awning blind that blocks the sun's rays.

A home office that works

HOME OFFICE

VELUX pleated blinds can be positioned anywhere on the roof window for a decorative lighting effect.

Blinds are an important part of creating the perfect setting in your home office. To help you make the most of this space, we have a range of blinds that soften incoming daylight, regulate temperature and provide privacy.

Study in style

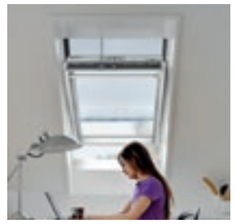
VELUX pleated blinds are an elegant way to provide privacy whilst bathing your room in a pleasant, soft light. They can be positioned anywhere on the roof window and can be controlled from the top and bottom so you can adjust the amount of light coming in while still enjoying the outside view.

Should you want to add more personality to your home office VELUX Roman blinds come in a variety of colours and patterns. The clever design of our Roman blinds mean you can easily swap the fabric in a matter of minutes – a perfect and easy way to update the room's interior.

Stay cool

To reduce screen glare and to prevent your office from becoming too warm, adding an external VELUX awning blind to your roof window will block the sun's rays before they hit the window pane, creating a comfortable environment to work in.

VELUX Roman blinds come in a variety of shades and structures.



Awning blinds reduce heat intake by up to 73%.

Your personal oasis

BATHROOM

Low-maintenance Venetian blinds add beauty and privacy to your bathroom.

VELUX Venetian blinds have a sleek cordless design, so they are safe and easy to use.

Pick&Click!®

VELUX Pick&Click!™ system makes installation fast and simple.

Roof windows fill any bathroom with natural light and fresh air. The extra daylight gives the room a more open, spacious feel and these high moisture areas benefit from added ventilation. As privacy is just as important as sunshine in the bathroom, VELUX blinds are essential.

Privacy and style

With VELUX Venetian blinds you can have both privacy and light. Just tilt the slats in any direction to adjust the angle of the light and achieve the right amount of privacy. These moisture resistant and cordless controlled blinds are easy-to-clean and come in 9 different colours to suit your personal style and decor.

Brighten your bath time

For flexible privacy while maintaining a view of the outdoors, our elegant pleated blinds can be positioned anywhere on the roof window and controlled from the top and bottom. They bathe your room in softly diffused sunlight and come in 20 different colours and designs, making it simple to add a contemporary feel to any bathroom.

Cooking in style and comfort

KITCHEN

Venetian blinds are stylish and practical.

The kitchen is often the busiest room in the home, so your blinds need to be as practical as they are beautiful. Roof windows are a huge asset in a warm, active kitchen because they provide exceptional ventilation and since cooking produces steam and residue, your blinds also need to be able to take the heat.

High performance blinds

Easy-to-clean VELUX Venetian blinds are the perfect choice for a kitchen. Not only are these blinds water and stain resistant, they are also simple to operate. Breakfast, lunch or dinner, Venetian blinds let you adjust the amount of incoming light for maximum comfort.

Farewell, uninvited dinner guests

Enjoy your meals with family and friends, not insects. VELUX insect screens integrate perfectly with your VELUX roof window to keep even the smallest pests out without affecting your view. Combine them with any of our blinds to create the perfect, bug-free solution for your kitchen.

VELUX insect screens are made of a durable, transparent net fabric and store neatly in their cases when not in use.

Choose from a variety of colours.

Awnings and shutters

AWNING BLINDS

VELUX awning blinds have a sleek external design.

With our VELUX INTEGRA® touch-screen control pad, you can manage all of your home's automated VELUX products in one place.

Exterior VELUX awning blinds reduce heat intake by up to 73%.

For a cool summer room, VELUX awning blinds provide solar heat reduction whilst ensuring you can maintain the view through your roof window.

Control heat as well as light

External awning blinds are the perfect way to keep a room cool by reducing the amount of heat entering through the roof window by up to 73%. Especially suited to south-facing roof windows, the blind stops the heat from the sun reaching the glass and radiating into the room. Their design also means they allow a pleasant diffused light to enter the room too.

Designed to integrate perfectly with your VELUX roof window, the awning blind is made from weather resistant net fabric. When not in use, the external blind rolls up and is kept out of sight. For additional light control and comfort, VELUX awning blinds can be combined with any interior VELUX blind.

Operation

VELUX awning blinds are available in manual, solar or electric powered operation. The manual awning blind can be rolled fully up or down by simply rotating the roof window 180° and fixing and releasing the hooks at the bottom of the sash. The solar awning blind is for use with solar or manual roof windows and comes complete with a battery operated control pad. Electric awning blinds are designed for use with VELUX INTEGRA® electric roof windows and the VELUX INTEGRA® touch-screen control pad. Both automatic operation systems put temperature control at your fingertips from anywhere in the room.

For roof windows manufactured before April 2001 you must also order ZOZ 228 to fit MML electric and MSL solar awning blinds.

ROLLER SHUTTERS

VELUX roller shutters reduce the heat impact from the sun by up to 90%.

Solar powered roller shutters work day or night, rain or shine without wiring or a connection to a power supply.

From full daylight to complete blackout, VELUX roller shutters offer you additional energy saving and noise reduction in an award-winning design.

All-round benefits

Roller shutters prevent the loss of energy, keeping your room warm in the winter and allowing you to completely block out light at any time. They offer noise reduction and protection for your roof windows during harsh weather and provide additional security for your home.

Best of all, our roller shutters are built to last. They are made of hard-wearing aluminium to ensure top performance, no matter what nature throws at them.

We rigorously test them in the most extreme conditions to ensure complete weather resistance and years of flawless operation.

Integrated design

VELUX roller shutters have been awarded the Red Dot design award and the IF product design award for their many innovative design features. Our roller shutters fit perfectly with your VELUX roof windows so installation is simple from the outside or inside of your home. VELUX roller shutters feature a sleek top casing, so they form an integrated part of your roof, regardless of the roofing materials.

Custom control

You can choose from manual, solar or electric operation. To adjust and soften incoming daylight, VELUX roller shutters can easily be combined with any of our interior blinds.

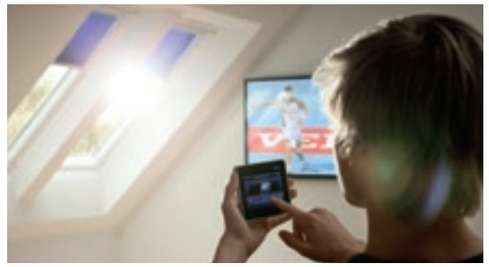
VELUX INTEGRA® remote controlled blinds mean maximum convenience throughout the day

Create the perfect mood with automation

Want to wake up with the sun? Or do you want some afternoon shade? Remote controlled blinds let you programme when and how you want your blinds to open and close. Giving you the atmosphere you want – without having to lift a finger.



Adjust daylight and privacy in seconds

Don't let too much glare spoil your TV watching or entertaining experience – adjust daylight or increase privacy with a single touch of the control pad.

Increase your indoor comfort

Blinds and sun screening are one of the easiest ways to quickly boost your indoor comfort. VELUX offers a wide range of blinds for heat protection, insulation, privacy, decoration and blackout.

Find the blind that's right for your window

Remote control – solar operated

VELUX INTEGRA® solar blinds and shutters are perfect for manual or solar powered roof windows and are easy to install as they are solar powered and require no connection to a power supply.

Perfect for:

- Manual roof windows for extra convenience.
- VELUX INTEGRA® solar powered roof windows within reach or out-of-reach.

Operation:

- Via the included remote control.
- Programmable control pad can be purchased separately.

Remote control – electrically operated

VELUX INTEGRA® electric blinds and shutters are perfect for mains powered VELUX INTEGRA® roof windows as they connect directly to the power supply of the window.

Perfect for:

- VELUX INTEGRA® electric roof windows within reach or out-of-reach.

Operation:

- Via the VELUX INTEGRA® control pad.
- Use the pre-defined programmes or create your own.

How to select your blinds

1 Select type

Choose an interior and/or exterior VELUX blind or shutter that meets your requirements in terms of heat protection, blackout, light adjustment or insect protection.

2 Select colour and design

Our blinds are available in an array of exciting colours and designs.

3 Select operation method

Choose between manual or automatic operation. Always consider automatically operated products for out-of-reach situations.

4 Select the right size

To identify the size of blind you need, check the data plate on your roof window which details its type and size (see opposite).

5 Installed in minutes

VELUX interior blinds are easily installed with our unique Pick&Click!™ system. Follow the instructions and your blinds will be fitted in minutes.

Pick&Click!®

VELUX roof windows are fitted with pre-installed brackets to ease installation and to ensure a perfect fit every time.

Blinds for flat roof windows

Flat roof sunscreening

To control the amount of incoming light or to reduce the indoor temperature in the summer – there are some great options to complete your VELUX flat roof window.

LIGHT-DIMMING ENERGY BLIND

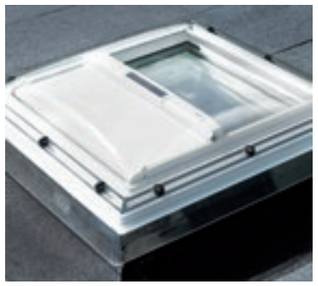
The light-dimming, double-pleated blind with aluminum coating between the cloth layers improves insulation and increases indoor comfort. The remote controlled electric (FMK) or solar (FSK) blind is available in two colours, black (1047) and white (1045). Please note that the solar blind is suitable for flat roof windows with a clear dome only.

- Blackout effect.
- Protects against cold from the outside.
- Enables complete privacy.

PLEATED BLIND

Perfect for softening incoming daylight and adding a decorative touch, pleated blinds open and close with a handy remote control. They are io-homecontrol® compatible and available in three colours, white (1016), classic sand (1259) and metallic blue (1265).

- Softly diffuses incoming light.
- Enables complete privacy.



AWNING BLIND

Installed between the window and the dome, transparent awning blinds are solar powered and operated by remote control. They keep the indoor temperature comfortable by filtering the strong rays of the sun and provide effective heat protection by up to 76%. Awning blinds are io-homecontrol® compatible and easy to install.
MSG awning blind is not compatible with a VELUX flat glass rooflight.

- Reduces passive heating by up to 76%.
- Dims daylight and prevents direct glare.
- Enables complete privacy.

Choosing the right blind

It's easy to select the right kind of blind for your home. Once you know what model of roof window you have, you can select the correct size of blind, the operation method you'd prefer, and what colour you want. You'll find our full guide to selecting your blinds on pages 30 and 31.

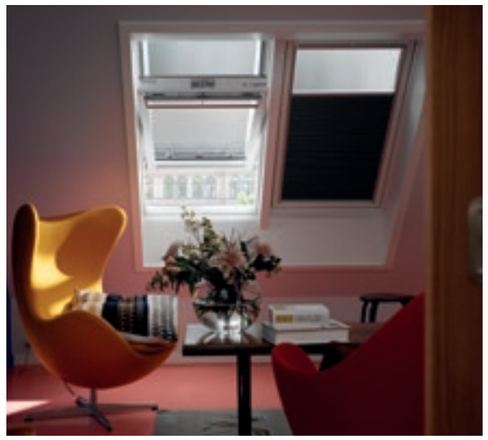
Improves insulation by up to 26%

Electrically powered products combined with a manual VELUX roof window require a control unit KUX 110.



Energy and awning blind package

Improve your indoor climate with the ability to block light and reduce heat with the VELUX energy blackout and awning blind package.

Awning blinds

The exterior VELUX awning blind blocks the sun's rays before they hit your window pane and reduces passive heating by up to 73%. Awning blinds are transparent, so you can still enjoy your view.

Energy blackout blinds

The VELUX energy blind offers variable blackout and an insulation effect of up to 26%. The double-pleated blackout cloth has an aluminium honeycomb structure within for significantly improved insulation. Energy blinds are not fixed at the top or bottom, so you can position them exactly where you need them for light control and privacy.

Accessories

Pole Control ZCT 200K £30.00

The VELUX telescopic pole makes it easy to manually operate centre-pivot roof windows or out-of-reach blinds when fitted with the correct adaptor.
The pole extends from 100cm to 180cm.

Pole Adaptors ZOZ 085 £7.20

Pole adaptor for VELUX manual blinds that are out-of-reach. Use along with the pole control for simple operation.

Control Unit KUX 110 £112.80

Control unit is for operation of an electrically operated blind on a manual roof window. The system consists of a control unit and a remote control.

VELUX INTEGRA® Control Pad KLR 200 £144.00

Upgrade your VELUX solar blind or VELUX INTEGRA® roof window manufactured after 2005 with this fully programmable touch-screen control pad.
